

Hi

I am a student studying in Michigan, the US. I would like to share a part of my experience. I hope this report will help you somehow. And I decided to write my report in English so hopefully you can see the improvement of my English.

1 School

My school is small Christian private school. We have only 16 students in our class. Each teacher has their classroom so we move to the classroom. And each grade has class sponsor so technically we do have a classroom, but we don't use it often. Since it is a small school, basically we can't choose what classes to take. So, I have the same schedule with most of my classmates. We have the same schedule every single weekday. And the time for class is about 52 minutes. Like 1st period is 8:00-8:56 and 2nd period is 9:00-9:52, for me, it was a little weird.

It is a Christian school so we pray every morning, have a Bible class, have chapel every Thursday. All of us go to church every Sunday morning. Some people go to church Wednesday after school, and they are called "Youth group"

2 Football

I like football, and I went to a high school game and a college game. The scale was incredibly big, like a high school game looked like a college game and a college game looked like a professional one for me. There were tons of people, even though it was a high school game, there were 13,000 people. I could not find the seat to take so I was standing whole time. The college game was also expensive. It was about 30 USD including taxes, which is about 20,000 in JPY.

3 Journal

I am keeping my journal. I got some advice from a person who had studied abroad to keep a journal during the stay. It feels like it helps me to clear my thoughts. It will be easy to share what I did with my friends by doing so. Also, I am sure it will help me to review my stay.

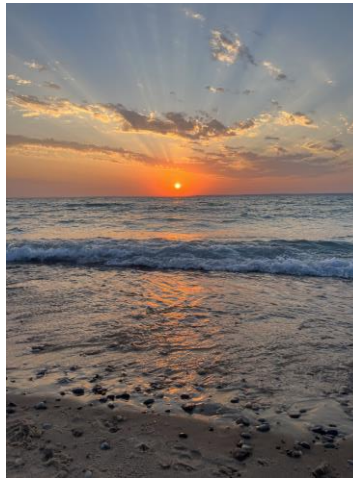

I just want to share it because I want to give somebody who is going to study abroad some ideas from this report. If you think it is a good idea, please try.

I hope you will have a great day. See you on the next report.
