

G'day, everyone. I am an exchange student who is studying in Adelaide for 10 months. Adelaide is a very safe place, but all things are expensive. People who live in Adelaide always use cars. Today's date is March First. I have passed 4 weeks since I came to Adelaide, and I experienced a lot. I want to tell everyone about what I experienced in Adelaide.

First, I want to talk about school. The school was very different from Hakuo high school. The school starts at 9 a.m., and finishes at 3 p.m. We have 20 minutes rest and 40 minutes rest. I go to school by bus for an hour. It is very hard. The first week, I was confused and nervous, but I tried talking to teachers and kept my mind positive, but sometimes I couldn't communicate with them, also I couldn't understand the class lesson. Moreover, I felt sad when I couldn't communicate with foreigners. I want to meet with my friends who live in Japan. However, last Friday, I hung out with friends who are Japanese students studying at the same school. I went to the comedy show, and it was fun. After that, I ate dinner with my friends. Its taste was good.

Second, I want to talk about my homestay. My homestay's family consists of a mother, father, two sons and an exchange student who came from Brazil, also sometimes, grandmother and grandfather come to the house and talk with us. They are very

kind. That's why I don't feel homesick. Especially, I like grandmother, because when I met with her, she always says "hello" with smile and give me a hug. Her smile makes me happy, so every weekend, I am looking forward to meeting with her.

Speaking of which, there were snowing in Japan. In Adelaide, it was very hot, because this year, the highest temperature was 45 degrees. I want to play with snow. It's just the beginning, but I'll do my best. There's still a lot I want to talk about, but I'll wrap it up here. Goodbye! See you next month.
