

Determination Exploration Creation

Tokyo Metropolitan  
**Koishikawa Secondary School**

Officially designated as  
**Super Science High School / Global Education Network 20**

This motto was first preached by ITO Choshichi, the first principal of our school in 1918, and remains our motto to this day. We educate students to be able to determine their aim, explore their way, and create their culture. Following this motto, we encourage students to be independent and continue to welcome life's challenges beyond graduation.

**Koishikawa Liberalism**

- Our students learn every subject including both humanities and science courses.
- Our students grapple with research projects through their six years.

**Fostering International Mindset**

- Our students are to visit Australia in the third grade and Singapore in the fifth grade.
- Many schools overseas visit our school so our students can mingle with students from overseas.

**High Level Math & Science Education**

- Our school is designated as SSH (Super Science High school) by the Ministry of Education. We train our students through advanced science education.
- Students have science classes at universities overseas during the summer vacation. We train our students as leaders who can take a great role on the global stage.

**International Exchange**
